

# UPHOLSTERY GUIDE TO RECOVERING Yamaha YDR "The Drive" FACTORY Backrest

YDRBK-STONE-CVR  
YDRBK-BLK-CVR

Required Tools: Stapler, Scissors or Utility Knife

- **IMPORTANT:** Do NOT disassemble OEM cushion! This particular backrest cannot be put back together. You will be reupholstering over the original vinyl layer and stapling into the plastic
- Place vinyl cover over existing seat back. Center the cushion within the vinyl form. On clean work surface, turn backrest and cover over so that the cushion is laying plastic side up.
- Tack shorter ends first with several staples at center to hold cover in place.
- Likewise, tack top and bottom with several staples to center cover at middle. A slit may be cut in the vinyl at middle to avoid excess bunching later as shown at right.
- Continue stapling from middle toward each corner but stopping short and finishing corners last.
- Trim excess vinyl using a scissors or utility knife.
