Unless otherwise specified, clear or white thread will be used.

Colored thread is available at no additional cost.

OPTIONAL UPGRADES / Additional Charges Apply:

Pleated vinyl:

Pleated vinyl provides visual interest as opposed to flat vinyl. Vinyl colors are no longer available in a choice of thermal heat-sealed pleat. This material had a polyester fiber fill, giving it the look of vintage automotive trim. If pleats are preferred, it will be hand sewn to achieve desired result. This will be listed on your invoice as p/n: **HS PLT**

Piping:

In sewing, piping is a type of trim consisting of a strip of folded fabric over a cord that is then inserted into a seam to define the edge of the cover. Customers request contrasting colored piping to create a neat, attractive finish to the look of their seat. Piping available on the Boxing Only (p/n: **PIPING-BOXING ONLY**), on Stripes Only (p/n: **PIPING-STRIPES ONLY**) or on Boxing and Stripes (p/n: **PIPING-BOXING/STRIPES**) in any of the above colors.

Cool Touch:

Up to 25% cooler than traditional vinyl! This will be listed on your invoice as p/n: **CT UPGRADE**.

CT WHITE

CT LT. GREY

CT GREY

CT ICE BLUE

CT ROYAL

CT BEIGE

CT NAVY

CT BURGUNDY

CT RED

CT PEBBLE

Step 3 – identify make/model for front covers or cushion

Step 4 – Please provide overall measurements if ordering an aftermarket rear seat!

Upholstery Tip: Sewn vinyl does not have the same 4-way stretch as factory style seamless vinyl. Remove the original cover and warm the replacement cover to ease the installation. Use relief cuts where applicable.
