Years We Have Manufactured Seat Products for the Golf Cart Industry

or visit www.grgolf.com/parts.php

GR Golf’s instant, web based cross reference is the definitive solution for accessing part, service and repair information. Featuring **one-to-one search by product cross reference** and a **search by vehicle tool** with the **same form, fit and function** as the **OEM**, GR Golf delivers the precision and depth needed to streamline your operations, improve accuracy, and enhance repair efficiency across the industry.

Who doesn’t want to work smarter & think less? – Save time with our covers

With GR Golf seamless vinyl back and bottom covers, your upholstery team can **Avoid Costly Mistakes** caused by orientating the cover on the cushion backwards or pulling the wrong model cover off your shelf and installing it. We’ve **added forward facing arrows indicating the front of the vehicle** to assist our customers with proper cover placement. To make your inventory self-explanatory and easy to organize, we’ve **inscribed part numbers** in our covers to help customers identify the main model and item number. These markings are in the excess (waste), which gets cut off after stapling.

Note: E-Z-Go uses adhesive to attach the vinyl upholstery to the original factory cushion so that the vinyl stays conformed to the basic bolstered seat shape. If the factory adhesive remains intact, it is suggested that GR Golf replacement covers be glued on top of the original factory covers using a spray adhesive such as Foam & Fabric 24 Spray Adhesive by 3M. This is a fast-tack industrial grade spray adhesive that bonds fabric to fabric for upholstery applications. This inexpensive adhesive is available by the can from industrial supply companies like Grainger or Fastenal. This same adhesive can also be used to glue the vinyl cover to the factory foam.

Building on 40+ years of seamless vinyl upholstery expertise

Seamless vinyl covers, pads & cushions

GR Golf is a dba of Wurms Diversified Solutions (WDS). WDS has thermoformed seamless vinyl covers for several industries since the 1980s. Our upholstery operations have assembled pads and cushions using seamless vinyl covers since 2005. Our durable products withstand many years of use. Several niche markets turn to us where exclusive items are produced as seamless vinyl covers, pads or complete cushion assemblies to OEM customer drawings including:

- Bumper pads & seating in the patient area of ambulances
- **Seating on golf cars and UTVs for personal, commercial and industrial use**
- Seating on recreational and sport vehicle market, ATVs and utility vehicles
- Healthcare equipment used in medical, veterinary, and dental markets for complete cushions used on examination tables, stools and chairs
- Pads for commercial shuttle buses
- Mechanics stools and creeper pads

Every seamless vinyl cover is made from superior materials. Seamless vinyl seat covers have no thread to become brittle and break and no point of entry for moisture to seep.

- Our in house wood operations is able to fabricate any needed wood substrates for our pads and cushions.
- Our in house plastic operations is able to fabricate any necessary back panels, seat pans and/or HDPE flip boards where applicable.
- Our upholstery department is fully qualified to assemble the best looking cushions in the industry.

For a free quote and to discuss your needs, don't hesitate to contact Wurms Diversified Solutions today. Experience the difference that our dedication to craftsmanship and innovation can make for your projects.
